METRO SHARE LEADERS AND MAJOR SHARE CHANGES

This table shows the 12+ Metro Share (6AM-MID, Mon-Sun) leaders for each rated market. Also listed are the stations in each market which had the largest gain in share or loss in share.

The period covered for the share changes in Fall '85 to Fall '86. It is my belief that year-to-year comparisons are more accurate and valid than "last book" comparisons.

**** Based on 12+ Metro, 1/4 HR. AVG, Broadcast Week. Calculated by dividing listening to non-listed stations by total listening to all radio stations. A large part of the non-listed listening is probably to public and non-commercial stations. Other listening to distant stations (clears). Other listening will be to local commercial stations which do not qualify for listing in the rating book. The importance of this table (and the table above) is that this is listening that is not going to local commercial outlets. This affects CPM's and the effectiveness of local radio.

RADIO REPS AND THEIR LEADING STATIONS

This section attempts to rank the radio representatives by ~~the~~ ratings success of the stations they carry on their lists. For each time a rep firm had a leading station in a market, it received one point. The number of stations/reps listed in each market depended on the market size. For markets one through ten up to seven stations/reps were listed. In 100+ markets only one or two stations/reps were listed.

The first table shows the number of stations a rep firm services which are among the leading facilities in its market. The second table shows the number of stations which the rep services which clearly rank number one in the ratings of its market.

I realize the limitations of a ranking like this. It penalizes reps which have small lists. It also doesn't cover reps which have the majority of their stations in unrated markets. It also ignores some stations which are very strong and very profitable (especially true in larger markets).

What this list does accomplish is that it indicates which rep firms have, to use a bridge term, the longest and strongest lists.

NOTE 1: Figures across the top of Tables 1 and 2 are market rankings. The figure in parenthesis (on Table 1) is the maximum number of stations selected in that market size.

NOTE 2: Selections were generally based on 12+ Metro, 1/4 HR AVG, Broadcast Week. In a few cases TSA and Cume results were considered. In other cases combinations were considered. Some decisions were purely subjective on my part.

INDIVIDUAL STATION AUDIENCE BREAKDOWNS

In this section the audience composition of over 600 stations is examined. This totals around 8% of all commercial stations in the United States. The following information is included for each station.

TIME SPENT LISTENING (TSL): This figure shows the amount of time which an average listener spends with a given station. The total is given in hours instead of 1/4 hours.

This figure is derived by the following calculation: Average 1/4 HR audience times 504 (the number of quarter hours in the Broadcast Week). The resulting figure is divided by the weekly Metro Cume. This figure is divided by four to come up with a figure in hours.

TURN OVER RATIO (T/O RATIO): This figure roughly indicates the number of groups of people which contribute to the station's average audience. It is calculated by taking the Metro Cume (12+, Broadcast Week) and dividing it by the Metro 1/4 HR AVG (Broadcast Week).

PER CENT EXCLUSIVE CUME (% EXCL): This fascinating figure indicates the loyalty of a station's audience. It is calculated by dividing the exclusive cume (12+ Metro, Broadcast Week) by the Metro Cume (12+, Broadcast Week).

PER CENT TEENS, 18-34, 18-49, 50+: This is simply the percentage of a station's total audience (12+ Metro, Broadcast Week) which lies in these demographic breaks.

PER CENT MALE/FEMALE (%M, %F): The methodology is the same as that for Teens, etc.

Below are the means for the above breakdowns by format. Also included is the number of stations sampled.

SECTION B

INDIVIDUAL MARKET REPORTS

NOTE: Following these definitions pages the Individual Market Reports can be found in alphabetical order.

DEFINITIONS, CLARIFICATIONS AND EXPLANATIONS

NOTE: Even long-time subscribers should read these pages very carefully. There have been numerous changes and additions to American Radio. It will greatly increase your understanding of the Individual Market Reports if you are familiar with the systems and methodologies used.

The best way to explain an Individual Market Report is to go through it section by section. We will use an imaginary market and will start with the top of the market report on the far left.

Arbitron Rank/Pop (12+): 49/512,000
MSA Rank/Pop: 44/601,000
ADI #50
Average Person Rating: 18.4
Market TSL: 24.5 hours

The Arbitron rank is the 12+ population of the Arbitron metro survey area. The rank number (49 in this case) is the ranking among the 170 Arbitron Standard radio markets only. Markets without a full rating book are not included.

The MSA (Metropolitan Statistical Area) rank is shown along with the total estimated population. Where the market has been split into two or more MSA's all of the MSA's are listed.

The Arbitron ADI ranking can be found directly below the MSA rank.

The APR is the Average Person Rating. The APR indicates the percentage of the 12+ population which is using radio from 6 AM-Midnight, Mon-Sun (the Broadcast Week). The APR is roughly comparable to television's Persons Viewing Television (PVT) figures.

The market TSL shows the "Time Spent Listening" by the average radio listener in the market. In this case the average listener spends 24.5 hours listening to radio.

Stations: 27/20
Diaries: 701/730/53.5%
Sample Target: 647
Standard Error: .721
% Below Line: 3.3
% Not Listed: 8.6

There were 27 stations listed in the rating book for this market. Of those 27 a total of 20 stations were listed above the line (home to Arbitron metro). Thus a total of seven stations were licensed to cities outside of the metro but they still qualified for inclusion in the rating book. You should be aware that some stations now appear above the line by virtue of its chosen home city of identification rather than by its FCC authorized city of license.

The information on the "Diaries" line is a bit complex but it is all very important:

1st figure: 701 - the number of usable (in-tab) diaries returned from the market's metro

2nd figure: 730 - in the metro there was one diary returned for every 730 people 12+

3rd figure: 53.5% - total returned (in-tab) diaries expressed as a percentage of the total individuals who were sent a diary

The sample target shows the number of in-tab diaries designated for the metro. This is basically Arbitron's goal for returned diaries. Remember that this number represents total diaries and does not necessarily refer to any individual demo. It is not a percentage of total people contacted. It is a percentage of total people sent diaries.

The standard error is based on Arbitron's method of estimating the reliability of their ratings. I have carried the formula through the first step.

The % below line figure indicates the percentage of total radio listenting earned by below the line stations.

This figure would reflect listening to distant stations, non-commercial and public stations, and local stations which did not have enough audience to qualify for listing in the book.

This figure along with the "% Below Line" figures indicate how much listening in the market is not available to the local commercial stations. This could have an affect on CPM's and also the effectiveness and saleability of local radio.

Est. 1986 Revenue: $14,500,000
HH Income: $25,700
Retail $: 3.5 Bil
Pop per Station: 25,600
#1 Biller: WAAA $2,000,000

The revenue estimates are based upon calculations made in the 1987 edition of Duncan's Radio Market Guide. The figures are gross and they do not include trades.

HH Income means Consumer Spendable Income per household. This market's estimate is $25,700.

Total retail sales in this market is estimated at 3.5 billion dollars.

The data comes from Sales & Marketing Management and they are dated 1 October 1986.

The population per Station shows the number of people (12+) per metro area radio station. The figure is calculated by dividing 12+ metro population by the number of "above-the-line" stations.

The #1 Biller shows the station I believe is the leading biller in the market and its estimated 1985 gross revenue. This data is extracted from the 1987 edition of Duncan's Radio Market Guide.

12+ METRO 1/4/SHARE	SUM 86	SPG 86	WIN 86	FAL 85	4 BOOK Avg.	BIRCH Share	12+ TSA 1/4/CUME	12+ METRO CUME/ METRO CUME RATING	SPG 86	FAL 85
1. WAAA-F 301/11.3	11.1	11.7	10.4	10.7	11.1	10.0	1. WAAA-F 363/4908	1. WBBB 4314/212	22.3	23.8

All of the figures in this section are based upon the Broadcast Week (Mon-Sun, 6A-MID). The audience figures are in hundreds. The ratings and shares are always percentages.

Reading from left to right: WAAA has 30,100 listeners per quarter hour in the metro. This earns the station an 11.3% share of audience during the latest rating period. The share for the last four rating books follows (in some smaller markets the last two books are listed). The next column shows the average of the last four books. This figure is provided only for those markets with quarterly measurement. Next is the Birch share for those markets which Birch surveys. The Birch share is the latest quarterly report.

In the TSA (total survey area) WAAA-F has a total audience of 36,300 per quarter hour and a weekly cume audience of 490,800.

WBBB has the highest 12+ Metro cume audience with a weekly total of 431,400. WBBB's Metro cume rating is 21.2%. That means that 21.2% of this market's population (12+) listens to WBBB for five minutes or more during a given week. Historical cume ratings follow.

The number of stations listed on these tables varies according to market size and according to the number of stations in the market.

If a station is simulcasting, this symbol "+" will appear next to the call letters where applicable. Whether I labeled the simulcasting station as AM or FM depended upon which band received the greatest amount of listening.

12+ FM SHARE (METRO): 59.64% (833 of 1401) (FAL 85: 57.41%)

These figures show how well FM radio is doing in the market - at least as far as listening levels are concerned. To calculate these figures I simply added up the Mon-Sun, 6A-MID, quarter hour numbers of all listed stations and divided it into the total numbers for the FM stations. There is, of course, listening to stations which do not qualify for a listing in the Arbitron report for the market. However, by definition this amount is small and it should not significantly affect the percentages.

DEMOGRAPHIC AND DAYPART RANKINGS

Directly below the FM Share figures are 21 demo and daypart rankings. The number of stations listed depends upon the size of the market. I am not allowed to print actual ratings figures per my agreement with Arbitron. All of these rankings are based on 1/4 HR AVG.

The criteria for the rankings is as follows:

FORMATS	AM	FM	TOTAL	%
Country	153 (3)	176 (2)	329 (5)	13.9

This table is based on the broadcast week, 1/4 Hour Average, 12+ Metro. The table includes every format in the market and every station which shows up in the market's metro. In this market there are 15,300 people listening to 3 different AM stations programming country music. The FM figures are added to AM to show a total for the market. 13.9% of radio listening in this market is devoted to stations programming country music.

The "Other Rated Stations" section includes all stations not listed on the 12+ METRO 1/4/SHARE column at the top of the individual market report. The city of license, 12+ metro share and 12+ cume rating is listed as well as the station's frequency.

CAPSULE STATION DESCRIPTIONS

WAAA-F, 92.5, 50 KW @ 500, CHR ABC-C, $73.00 (Torbet) XYZ Group Thomas Duncan

I have greatly expanded the number of stations in each market which qualify for a capsule description. Now nearly every station in the metro is included.

Our sample station, WAAA-F, has a frequency of 92.5. It's power is 50 KW and its Height Above Average Terrain (HAAT) is 500 feet. It is unfortunate but true that some stations attempt to deceive advertisers about their power and HAAT. I think I have found the true facilitie's data for these stations. However, a few may have slipped by me. If you see any incorrect figures, please let me know.

For AM stations night power is listed if it differs from day power. Directionality is indicated as follows:

DA, DAYS - directional daytimer
DA-1 - directional day and night - 1 pattern
DA-2 - directional day and night - 2 patterns
DA-N - directional at night only
DA-D - directional during the day only

WAAA-F programs a CHR format.
Next is the station's network affiliation if it has one:

ABC-C	ABC	Contemporary	APR	Associated Press Radio
ABC-D	ABC	Direction	CBS	CBS
ABC-I	ABC	Information	CBS-R	CBS Radio Radio
ABC-F	ABC	FM	MBS	Mutual
ABC-E	ABC	Entertainment	NBC	NBC
ABC-R	ABC	Rock	NBC-T	NBC Talk
ABC-T	ABC	Talk	Source	NBC Source
NBN	National Black		USA 1	USA
SBN	Sheridan		USA 2	USA 2
UPI	United Press International		WSJ	Wall Street Journal
Trans	Transtar		SMN	Satellite Music Network

NOTE: The name of the General Manager is listed in the Spring Report only.

The spot rate is based upon a 18 spot per week schedule with equal distribution in AMD, MID, PMD, and EVE. TAP plans were used only if the spots could be equally distributed. In many cases the rate listed does not appear on the station's rate card. This is because I calculated an average rate for the four dayparts.

Calculating a rate is very difficult because so many stations have withdrawn their rates from SRDS. Often I had to make an estimate based on a past known rate projected to the present. I have indicated these stations with an * immediately following the rate. I believe that my estimates are close in most cases. However, I can not guarantee their accuracy.

When a station uses a grid card I used an average of the highest and lowest grids for my calculations.

Following the spot rate the station's national representative can be found in parentheses. Next is the group ownership if there is any.

On the two page market reports four additional listings can be found directly below the capsule descriptions. They are:

CALL LETTER CHANGES:	The old calls and new calls for stations which have changed calls since the last issue of American Radio. The date of the change is listed if it is available.
FORMAT CHANGES:	This table should probably be called "major format changes". It is nearly impossible to track down every subtle change in format for every station. I hope to list the major changes at major stations since the previous edition of American Radio.
STATION SALES:	This section lists the proposed sales in each market. These sales do not necessarily close. If I know the brokers involved, they are also listed. In some cases I had to estimate the sale price.
MISCELLANEOUS COMMENTS:	These are various comments and observations which come to my mind as I process that data for each market.

NOTE: On other market reports which do not have two pages of data, this same information can be found under the heading of "Miscellaneous Comments".

DUNCAN'S RADIO MARKET GUIDE

Designed to be a companion volume to AMERICAN RADIO, this book examines the economic conditions of 170 markets. Included are: radio revenue histories and projections on a yearly basis between 1981 and 1991; revenue estimates for over 1,500 important stations; revenue estimates for competitive media (TV, newspaper, outdoor; Duncan's opinions about each market; population and retail sales histories and projections; group revenue estimates; radio's most admired groups and stations; local radio account information; revenue per share point estimates; sation sales since 1982; and much, much more (over 30 other tables).

PUBLISHED EVERY DECEMBER Price: $195.00

AMERICAN RADIO - 10 YEAR ANNIVERSARY ISSUE

This very special issue was published in early 1987. Subtitled "A Prose and Statistical History (1976 to 1986)" it provides a history of each rated market covering the last decade. Included are station ratings for each year, station sales since 1970, format and call letter changes covering the last decade and much, much more. The prose portion is a series of articles written by 50 knowledgeable and talented radio people. These articles provide a history of radio covering the decade. This is the finest publication we have ever produced. You will find it helpful, valuable, and interesting.

INTRODUCTION

I am pleased to present the first edition of American Radio - Winter 1987 Supplement. This book is designed to supplement the primary editions of American Radio by providing updated summaries of the 76 markets which Arbitron and Birch survey on a quarterly basis.

The "Winter Supplement" is issued every May.

Your support of my work is sincerely appreciated. Please feel free to make comments or suggestions at any time. I urge you to do so. I can be reached at this address:

Usually I do not completely revise the station descriptions until the Spring issue of American Radio. However, I had time to revise about 50% of the markets for this supplement. Those markets which are completely revised are capitalized in the listing above. Also you can identify those markets which are revised because the names of the general managers are listed.

I have begun implementing an important change in the station descriptions. Previously we had listed a "national" rate estimate for each station. This rate was based on 18 spots per week with equal distribution throughout the primary day parts. I have never been very happy with this figure. For one thing the rate cards are not easy to acquire. For another, let's face reality, the national rates often are not indicative of the normal rates of the station.

Thus, I am gradually dropping the national rate as the norm unless I have access to the actual rate card. If I do not know the national rate I am now estimating the station's unit rate. These estimates are marked with an asterisk (*) after the rate.

So far I have only done this for the markets which are capitalized in the above listing.

The unit rate estimate is what I project is the average rate for all spots run on a station. The estimate is derived by taking the stations gross billings and working backwards with a formula based on spots per hour, the percentage of inventory sold and other factors.

I know this move will be controversial and I would like to hear your feelings on the matter before I implement it fully. Please give me a call.

1987 PUBLICATIONS FROM JIM DUNCAN

AMERICAN RADIO

Now a quarterly (with one supplement) AMERICAN RADIO remains the radio industry's most complete and timely sourcebook of radio ratings and programming information. There are over 30 tables and rankings for each market plus - in the Spring and Fall editions - over 60 pages of national rankings. AMERICAN RADIO is considered to be the "bible" of the radio industry and is required reading for anyone involved with radio.

Issue	Release Date	Number of Markets	Price

DUNCAN'S RADIO MARKET GUIDE

Designed to be a companion volume to AMERICAN RADIO, this book examines the economic conditions of 170 markets. Included are: radio revenue histories and projections on a yearly basis between 1981 and 1991; revenue estimates for over 1,500 important stations; revenue estimates for competitive media (TV, newspaper, outdoor; Duncan's opinions about each market; population and retail sales histories and projections; group revenue estimates; radio's most admired groups and stations; local radio account information; revenue per share point estimates; station sales since 1982; and much, much more (over 30 other tables).

PUBLISHED EVERY DECEMBER Price: $195.00

AMERICAN RADIO - 10 YEAR ANNIVERSARY ISSUE

This very special issue was published in early 1987. Subtitled "A Prose and Statistical History (1976 to 1986)" it provides a history of each rated market covering the last decade. Included are station ratings for each year, station sales since 1970, format and call letter changes covering the last decade and much, much more. The prose portion is a series of articles written by 50 knowledgeable and talented radio people. These articles provide a history of radio covering the decade. This is the finest publication we have ever produced. You will find it helpful, valuable, and interesting.

Spring 1987 Achievement Awards

		Honorable Mention
GROUP:	New City	Bloomington Clear Channel
MAJOR MARKET:	WRBQ A/F Tampa	WQUE-F New Orleans WTMI-F Miami KTWV-F Los Angeles
MEDIUM MARKET:	WIVK A/F Knoxville	WAPE-F Jacksonville
SMALL MARKET:	WIOG-F Saginaw/Flint	WVIC-F Lansing
VERY SMALL MARKET:	WZFX-F Fayetteville, NC WIKS-F Greenville, NC (Coastal Carolina)	WJET-F Erie WWNC Asheville WROK Rockford

The achievement awards were begun in 1983. There is no formula for making these selections. The only requirement is that I think a group or station stands out because of its performance over the last year. There are no plaques or scrolls or anything like that. Just a "well done" and the fact that someone noticed an outstanding performance.

Dick Ferguson's New City was a close runnerup to Emmis in 1986 and is the clear winner this year. The reasons for the selection of New City are numerous:

A. New City was formed in late 1985 when Ferguson and his partners purchased the Katz group. Of all the major deals I have examined over the years, this was probably the sweetest for the buyer I have seen. For about $70,000,000 New City bought nearly $35,000,000 in gross revenues (for 1986) and an estimated $11,400,000 in "year-of-sale" cash flow. That works out to between six and seven times cash flow.

B. New City has more overall number one stations (12+ Share) than any other group. New City stations lead the markets of Orlando, Birmingham, Tulsa, Syracuse, and Worcester. They are a close number two in Bridgeport.

C. Among group CEO's, New City is the third most admired group. As voted by station managers, the group ranked sixth. This according to survey results in the 1987 edition of Duncan's Radio Market Guide.

D. New City has purchased the Swanson stations in San Antonio, Tulsa and Oklahoma City. I believe this will eventually turn out to be a very smart buy. Tulsa and San Antonio are basically good radio markets going through bad times. I believe these markets are due for a turn.

WRBQ in Tampa earned the Achievement Award for Major Markets. This station is amazing. It just keeps growing in ratings and revenue. WRBQ now has an 18.8 share in Tampa and has enjoyed six consecutive "up" books. In 1986, WRBQ billed over $13,000,000 and in 1987 it should bill close to $16,000,000. WRBQ is owned by Edens Broadcasting.

WIVK A/F, owned by Dick Broadcasting and managed by Bobby Denton, now commands a 37.1% share of the Knoxville market and is the 45th most listened-to-station in the country.

In the last year, WIOG has picked up 10 share points in its home market of Saginaw-Bay City and another 17 points in the Flint market. The station did move from a Class A to a Class C facility, but this is a truly astounding accomplishment. WIOG ranks as the 87th most listened-to-station. This is the highest rank I can remember for a small market station. WIOG is owned by Booth Broadcasting and is managed by John Casey.

Tom Joyner has primarily been known as a station trader. He never really hung on to a station long enough to become known as a station operator. Based on his performance with WZFX in Fayetteville, NC and WIKS in Greenville, SC, Joyner may well acquire a new image. Both of these Black formatted stations come out of nowhere to lead their markets. WZFX had the largest share increase (+17.8) of any station; WIKS (+16.9) had the third largest increase.

FORMATS

Formats with the greatest share increases include Classical (+7.6%), Black/Urban (+6.7%), and Spanish (+5.6%). Formats with the largest share decreases were AOR/Classic (-11.7%), Nostalgia (-15.2%), and BTFL/EZ (-5.4%). AC/SOFT/OLDIES remains the leading format with 16.84% of all listening devoted to that group. Jazz/New Age debuted with about 0.9% of listening.

See the "Station Format and Format Listenership" page for more detailed information.

LEADING STATIONS

WHTZ-F in New York is again the most listened to station in the U.S. (1/4 HOUR AVG). Stations in the top 100 making impressive gains include: KIIS, WQHT, WNSR, WRBQ, WXKS, WIVK, WSKQ, KLSX, WBZZ, WKSZ, WYAY, WDAF, WYSP, KILT, WNCN, KNIX, WWDC, WVEE, WIOG, WLW, KZZP, KRBE AND WBSB.

OTHER LEADERS

12+ Metro Share:	WWNC	Asheville
12+ Cume Rating:	WWNC	Asheville
12+ TSA Cume:	WINS	New York

FM SHARE

FM share jumped by over 4.4% to 71.835%. This represents the largest percentage increase since 1983. This also marks the first time that FM share broke the 70% mark. Our prediction made back in 1980 that FM share would be around 76% by the end of the decade appears to be right on target although the size of this year's increase came as a bit of a surprise.

Evansville is the new FM share leader with 91.79%. Lancaster and Lansing both had an FM share of more than 90%. Asheville was the only market with an FM share of less than 50%.

CHANGES IN THIS EDITION OF AMERICAN RADIO

As usual, we have incorporated some changes in *American Radio*. We have added a new format group: Jazz/New Age/ Eclectic. I believe that with the success of KTWV in Los Angeles, this format has proved its viability. While I do not believe it will be a major format, I do believe it will earn a two or three percent share of listening by 1989.

In the Individual Market Reports, we have dropped the 35-64 ranking and replaced it with 35+.

We also now offer 4 Book averages for all markets which are rated quarterly. With so many rating books each year, this should give a perspective which will be helpful.

I have begun implementing an important change in the station descriptions. Previously we had listed a "national" rate estimate for each station. This rate was based on 18 spots per week with equal distribution throughout the primary day parts. I have never been very happy with this figure. For one thing, the rate cards are not easy to acquire. For another, let's face reality, the national rates often are not indicative of the normal rates of the station.

Thus, I am *gradually* dropping the national rate as the norm *unless* I have access to the actual rate card. If I do not know the national rate, I am now estimating the station's *unit* rate. These estimates are marked with an asterisk (*) after the rate.

The unit rate estimate is what I project is the average rate for all spots run on a station. The estimate is derived by taking the station's gross billings and working backwards with a formula based on spots per hour, the percentage of inventory sold and other factors.

I know this move will be controversial and I would like to hear your feelings on the matter before I implement it fully. Please give me a call.

American Radio mourns the passing of Steve White of NBC radio.

THE
JOHN BAYLISS
BROADCAST FOUNDATION

INVEST IN RADIO'S FUTURE
SUPPORT THE JOHN BAYLISS SCHOLARSHIP FUND

THE FOUNDATION

The John Bayliss Broadcast Foundation was established by friends and colleagues in the radio industry to perpetuate the memory of John Bayliss, a leading broadcast executive, and his many contributions to the radio industry over a 30-year span. John Bayliss was introduced to radio while he served in the U.S. Air Force. After that he worked in a variety of increasingly responsible radio positions and established an enviable record of performance and profitability in radio management and sales. An innovative, problem-solving leader, John earned the Hall Radio Report nomination for Radio Executive of the Year and Group Executive of the Year in 1977 and 1978. The Foundation's purpose is the development of young talent for the radio industry, so that the broadcasting principles John stood for could live on in his name.

THE SCHOLARSHIP FUND

The scholarship fund helps finance the education of many college students who aspire to a career in radio broadcasting. Individual and corporate donations increase the Foundation's endowment so that outstanding young talent may be recognized and given every opportunity to succeed in the broadcasting field of their (and your) choice. In the past three years, 13 scholarships have been awarded to college juniors and seniors and an intern program has been established to allow a lucky student to gain "hands-on" training in a commercial environment.

In the three years since the Foundation was established by John Bayliss' industry friends and family, the Foundation has received its tax-exempt status; started scholarship programs at universities across the United States; initiated an intern program and held a "media roast" fund-raiser, now an annual event, specifically to raise scholarship dollars. Please help us increase the endowment, and the scholarships the Foundation can award next year, by sending a generous donation today. Your investment will be seen, and heard, in tomorrow's radio broadcasts. The Foundation is supported solely by charitable contributions from industry leaders, who, like you, feel a responsibility to the future of radio.

Thank you for your support.

Please make checks payable to: The John Bayliss Broadcast Foundation.

METRO SHARE LEADERS AND MAJOR SHARE CHANGES

This table shows the 12+ Metro Share (6AM-MID, Mon-Sun) leaders for each rated market. Also listed are the stations in each market which had the largest gain in share or loss in share.

The period covered for the share change is Spring '86 to Spring '87. It is my belief that year-to-year comparisons are more accurate and valid than "last book" comparisons.

**** Based on 12+ Metro, 1/4 HR AVG, Broadcast Week. Calculated by dividing listening to non-listed stations by total listening to all radio stations. A large part of the non-listed listening is probably to public and non-commercial stations. Other listening to distant stations (clears). Other listening will be to local commercial stations which do not qualify for listing in the rating book. The importance of this table (and the table above) is that this is listening that is not going to local commercial outlets. This affects CPM's and the effectiveness of local radio.

RADIO REPS AND THEIR LEADING STATIONS

This section attempts to rank the radio representatives by the ratings success of the stations they carry on their lists. For each time a rep firm had a leading station in a market it received one point. The number of stations/reps listed in each market depended on the market size. For markets one through ten, up to seven stations/reps were listed. In 100+ markets, only one or two stations/reps were listed.

The first table shows the number of stations a rep firm services which are among the leading facilities in its market. The second table shows the number of stations which the rep services which clearly rank number one in the ratings of its market.

I realize the limitations of a ranking like this. It penalizes reps which have small lists. It also doesn't cover reps which have the majority of their stations in unrated markets. It also ignores some stations which are very strong and very profitable (especially true in larger markets).

What this list does accomplish is that it indicates which rep firms have, to use a bridge term, the longest and strongest lists.

NOTE 1: Figures across the top of tables 1 and 2 are market rankings. The figure in parenthesis (on Table 1) is the maximum number of stations selected in that market size.

NOTE 2: Selections were generally based on 12+ Metro, 1/4 HR AVG, Broadcast Week. In a few cases TSA and Cume results were considered. In other cases combinations were considered. Some decisions were purely subjective on my part.

INDIVIDUAL STATION AUDIENCE BREAKDOWNS

In this section the audience composition of almost 800 stations is examined. This total equals nearly 10% of all commercial radio stations in the United States. The following information is included for each station:

TIME SPENT LISTENING (TSL): This figure shows the amount of time which an average listener spends with a given station. The total is given in hours instead of 1/4 hours.
This figure is derived by the following calculation: Average 1/4 HR audience times 504 (the number of quarter hours in the Broadcast Week). The resulting figure is divided by the weekly Metro Cume. This figure is divided by four to come up with a figure in hours.

TURN OVER RATIO (T/O RATIO): This figure roughly indicates the number of groups of people which contribute to the station's average audience. It is calculated by taking the Metro Cume (12+, Broadcast Week) and dividing it by the Metro 1/4 HR AVG (Broadcast Week).

PER CENT EXCLUSIVE CUME (% EXCL): This fascinating figure indicates the loyalty of a station's audience. It is calculated by dividing the exclusive cume (12+ Metro, Broadcast Week) by the Metro Cume (12+, Broadcast Week).

PER CENT 12-24, 25-54, 55+: As of Spring 1987, we have changed the ages covered in this breakdown. You may recall that in previous editions, the cells were Teens, 18-34, 18-49, and 50+. The changes were made for two reasons. First of all the new Arbitron rating books make it easier to calculate this cells. Secondly, I think the new cells better refelct those which readers are most interested.
This figure is simply the percentage of a station's total audience (12+ Metro AQH, Broadcast Week), which lies in these demographic cells.

PER CENT MALE/FEMALE (%M, %F): The methodology is the same as that for 12-24, 25-54, etc.

Below are the means by format. Also included is the number of stations sampled.

SECTION B

INDIVIDUAL MARKET REPORTS

NOTE: Following these definitions pages the Individual Market Reports can be found in alphabetical order.

DEFINITIONS, CLARIFICATIONS AND EXPLANATIONS

NOTE: Even long-time subscribers should read these pages very carefully. There have been numerous changes and additions to American Radio. It will greatly increase your understanding of the Individual Market Reports if you are familiar with the systems and methodologies used.

The best way to explain an Individual Market Report is to go through it section by section. We will use an imaginary market and will start with the top of the market report on the far left.

Arbitron Rank/Pop (12+): 49/512,000
MSA Rank/Pop: 44/601,000
ADI #50
Average Person Rating: 18.4
Market TSL: 24.5 hours

The Arbitron rank is the 12+ population of the Arbitron metro survey area. The rank number (49 in this case) is the ranking among the 170 Arbitron Standard radio markets only. Markets without a full rating book are not included.

The MSA (Metropolitan Statistical Area) rank is shown along with the total estimated population. Where the market has been split into two or more MSA's all of the MSA's are listed.

The Arbitron ADI ranking can be found directly below the MSA rank.

The APR is the Average Person Rating. The APR indicates the percentage of the 12+ population which is using radio from 6 AM-Midnight, Mon-Sun (the Broadcast Week). The APR is roughly comparable to television's Persons Viewing Television (PVT) figures.

The market TSL shows the "Time Spent Listening" by the average radio listener in the market. In this case the average listener spends 24.5 hours listening to radio.

Stations: 27/20
Diaries: 701/730/53.5%
Sample Target: 647
Standard Error: .721
% Below Line: 3.3
% Not Listed: 8.6

There were 27 stations listed in the rating book for this market. Of those 27 a total of 20 stations were listed above the line (home to Arbitron metro). Thus a total of seven stations were licensed to cities outside of the metro but they still qualified for inclusion in the rating book. You should be aware that some stations now appear above the line by virtue of its chosen home city of identification rather than by its FCC authorized city of license.

The information on the "Diaries" line is a bit complex but it is all very important:

1st figure: 701 - the number of usable (in-tab) diaries returned from the market's metro

2nd figure: 730 - in the metro there was one diary returned for every 730 people 12+

3rd figure: 53.5% - total returned (in-tab) diaries expressed as a percentage of the total individuals who were sent a diary

The sample target shows the number of in-tab diaries designated for the metro. This is basically Arbitron's goal for returned diaries. Remember that this number represents total diaries and does not necessarily refer to any individual demo. It is not a percentage of total people contacted. It is a percentage of total people sent diaries.

The standard error is based on Arbitron's method of estimating the reliability of their ratings. I have carried the formula through the first step.

The % below line figure indicates the percentage of total radio listenting earned by below the line stations.

This figure would reflect listening to distant stations, non-commercial and public stations, and local stations which did not have enough audience to qualify for listing in the book.

This figure along with the "% Below Line" figures indicate how much listening in the market is not available to the local commercial stations. This could have an affect on CPM's and also the effectiveness and saleability of local radio.

Est. 1986 Revenue: $14,500,000
HH Income: $25,700
Retail $: 3.5 Bil
Pop per Station: 25,600
#1 Biller: WAAA $2,000,000

The revenue estimates are based upon calculations made in the 1987 edition of Duncan's Radio Market Guide. The figures are gross and they do not include trades.

HH Income means Consumer Spendable Income per household. This market's estimate is $25,700.

Total retail sales in this market is estimated at 3.5 billion dollars.

The data comes from Sales & Marketing Management and they are dated 1 October 1986.

The population per Station shows the number of people (12+) per metro area radio station. The figure is calculated by dividing 12+ metro population by the number of "above-the-line" stations.

The #1 Biller shows the station I believe is the leading biller in the market and its estimated 1985 gross revenue. This data is extracted from the 1987 edition of Duncan's Radio Market Guide.

12+ METRO 1/4/SHARE	SUM 86	SPG 86	WIN 86	FAL 85	4 BOOK Avg.	BIRCH Share	12+ TSA 1/4/CUME	12+ METRO CUME/ METRO CUME RATING	SPG 86	FAL 85
1. WAAA-F 301/11.3	11.1	11.7	10.4	10.7	11.1	10.0	1. WAAA-F 363/4908	1. WBBB 4314/212	22.3	23.8

All of the figures in this section are based upon the Broadcast Week (Mon-Sun, 6A-MID). The audience figures are in hundreds. The ratings and shares are always percentages.

Reading from left to right: WAAA has 30,100 listeners per quarter hour in the metro. This earns the station an 11.3% share of audience during the latest rating period. The share for the last four rating books follows (in some smaller markets the last two books are listed). The next column shows the average of the last four books. This figure is provided only for those markets with quarterly measurement. Next is the Birch share for those markets which Birch surveys. The Birch share is the latest quarterly report.

In the TSA (total survey area) WAAA-F has a total audience of 36,300 per quarter hour and a weekly cume audience of 490,800.

WBBB has the highest 12+ Metro cume audience with a weekly total of 431,400. WBBB's Metro cume rating is 21.2%. That means that 21.2% of this market's population (12+) listens to WBBB for five minutes or more during a given week. Historical cume ratings follow.

The number of stations listed on these tables varies according to market size and according to the number of stations in the market.

If a station is simulcasting, this symbol "+" will appear next to the call letters where applicable. Whether I labeled the simulcasting station as AM or FM depended upon which band received the greatest amount of listening.

12+ FM SHARE (METRO): 59.64% (833 of 1401) (FAL 85: 57.41%)

These figures show how well FM radio is doing in the market - at least as far as listening levels are concerned. To calculate these figures I simply added up the Mon-Sun, 6A-MID, quarter hour numbers of all listed stations and divided it into the total numbers for the FM stations. There is, of course, listening to stations which do not qualify for a listing in the Arbitron report for the market. However, by definition this amount is small and it should not significantly affect the percentages.

DEMOGRAPHIC AND DAYPART RANKINGS

Directly below the FM Share figures are 21 demo and daypart rankings. The number of stations listed depends upon the size of the market. I am not allowed to print actual ratings figures per my agreement with Arbitron. All of these rankings are based on 1/4 HR AVG.

The criteria for the rankings is as follows:

TEENS: Ages 12-17, Mon-Sun, 6A-MID, Metro
18-34: Adults 18-34, Mon-Sun, 6A-MID, Metro

NOTE: If a station's call letters are followed by a > symbol it means there is a very large difference between that station and the station following it in the ranking.

FORMATS	AM	FM	TOTAL	%
Country	153 (3)	176 (2)	329 (5)	13.9

This table is based on the broadcast week, 1/4 Hour Average, 12+ Metro. The table includes every format in the market and every station which shows up in the market's metro. In this market there are 15,300 people listening to 3 different AM stations programming country music. The FM figures are added to AM to show a total for the market. 13.9% of radio listening in this market is devoted to stations programming country music.

The "Other Rated Stations" section includes all stations not listed on the 12+ METRO 1/4/SHARE column at the top of the individual market report. The city of license, 12+ metro share and 12+ cume rating is listed as well as the station's frequency.

CAPSULE STATION DESCRIPTIONS

WAAA-F, 92.5, 50 KW @ 500, CHR ABC-C, $73.00 (Torbet) XYZ Group Thomas Duncan

I have greatly expanded the number of stations in each market which qualify for a capsule description. Now nearly every station in the metro is included.

Our sample station, WAAA-F, has a frequency of 92.5. It's power is 50 KW and its Height Above Average Terrain (HAAT) is 500 feet. It is unfortunate but true that some stations attempt to deceive advertisers about their power and HAAT. I think I have found the true facilitie's data for these stations. However, a few may have slipped by me. If you see any incorrect figures, please let me know.

For AM stations night power is listed if it differs from day power. Directionality is indicated as follows:

DA, DAYS - directional daytimer
DA-1 - directional day and night - 1 pattern
DA-2 - directional day and night - 2 patterns
DA-N - directional at night only
DA-D - directional during the day only

WAAA-F programs a CHR format.
Next is the station's network affiliation if it has one:

ABC-C	ABC	Contemporary	APR	Associated Press Radio
ABC-D	ABC	Direction	CBS	CBS
ABC-I	ABC	Information	CBS-R	CBS Radio Radio
ABC-F	ABC	FM	MBS	Mutual
ABC-E	ABC	Entertainment	NBC	NBC
ABC-R	ABC	Rock	NBC-T	NBC Talk
ABC-T	ABC	Talk	Source	NBC Source
NBN	National Black		US 1	US 1
SBN	Sheridan		US 2	US 2
UPI	United Press International		WSJ	Wall Street Journal
Trans	Transtar		SMN	Satellite Music Network

NOTE: The name of the General Manager is listed in the Spring Report only.

The spot rate is now calculated in two different ways. For those stations which make their rate cards accessible, I based the rate on an 18 spot per week schedule with equal distribution throughout the primary dayparts. TAP plans were used only if the spots could be equally distributed.

If there is an asterisk next to the rate, it means that I had to estimate the station's rate. The rate listed is not the national rate but my estimate of the station's unit rate. The unit rate estimate is what I project is the average rate for all spots run on the station. The estimate is usually derived by taking the station's gross billings and working backwards with a formula based on spots per hour, the percentage of inventory sold, and other factors. Remember that these estimates are marked with an asterisk (*).

I believe that these estimates are generally quite close. However, I can not guarantee their accuracy.

Following the spot rate, the station's national representative can be found in parenthesis. Next is the group ownership, if there is any.

On the two page market reports four additional listings can be found directly below the capsule descriptions. They are:

CALL LETTER CHANGES:	The old calls and new calls for stations which have changed calls since the last issue of *American Radio*. The date of the change is listed if it is available.
FORMAT CHANGES:	This table should probably be called "major format changes". It is nearly impossible to track down every subtle change in format for every station. I hope to list the major changes at major stations since the previous edition of *American Radio*.
STATION SALES:	This section lists the proposed sales in each market. These sales *do not* necessarily close. If I know the brokers involved, they are also listed. In some cases I had to estimate the sale price.
MISCELLANEOUS COMMENTS:	These are various comments and observations which come to my mind as I process that data for each market.

NOTE: On other market reports which do not have two pages of data, this same information can be found under the heading of "Miscellaneous Comments".

1987 PUBLICATIONS FROM JIM DUNCAN

AMERICAN RADIO

Now a quarterly (with one supplement) AMERICAN RADIO remains the radio industry's most complete and timely sourcebook of radio ratings and programming information. There are over 30 tables and rankings for each market plus - in the Spring and Fall editions - over 60 pages of national rankings. AMERICAN RADIO is considered to be the "bible" of the radio industry and is required reading for anyone involved with radio.

Issue	Release Date	Number of Markets	Price

Winter Supplement	May 1988	75	$45.00

DUNCAN'S RADIO MARKET GUIDE

Designed to be a companion volume to AMERICAN RADIO, this book examines the economic conditions of 170 markets. Included are: radio revenue histories and projections on a yearly basis between 1981 and 1991; revenue estimates for over 1,500 important stations; revenue estimates for competitive media (TV, newspaper, outdoor; Duncan's opinions about each market; population and retail sales histories and projections; group revenue estimates; radio's most admired groups and stations; local radio account information; revenue per share point estimates; station sales since 1982; and much, much more (over 30 other tables).

PUBLISHED EVERY DECEMBER Price: $195.00

AMERICAN RADIO - 10 YEAR ANNIVERSARY ISSUE

This very special issue was published in early 1987. Subtitled "A Prose and Statistical History (1976 to 1986)" it provides a history of each rated market covering the last decade. Included are station ratings for each year, station sales since 1970, format and call letter changes covering the last decade and much, much more. The prose portion is a series of articles written by 50 knowledgeable and talented radio people. These articles provide a history of radio covering the decade. This is the finest publication we have ever produced. You will find it helpful, valuable, and interesting.

INTRODUCTION

I am pleased to present the fourth edition of American Radio - Small Market Edition. This book is designed to complement the primary edition of American Radio by providing expanded coverage of over 125 smaller radio markets in the United States.

The Small Market Edition is issued every September.

Your support of my work is sincerely appreciated. Please feel free to make comments or suggestions at any time. I urge you to do so. I can be reached at this address:

SECTION A

ARBITRON CONDENSED RADIO MARKET REPORTS

Arbitron completely redesigned its "Condensed" report this year so we have also had to change our format. Arbitron no longer includes total week cume or 1/4 HR AVG for the TSA (Mon-Sun, 6A-Mid). They also dropped the total week metro cume figure but we were able to compute that by using the cume rating.

The daypart and demo breakdowns differ also because of the changes Arbitron made.

We have added a 12+ Cume Rating (current and trend) which should be helpful.

Our presentation of 1/4/SHARE, Metro Cume and Cume Rating differs somewhat from past editions. You now read all the way across the page for each station - from left to right. The stations are still ranked by 1/4 HR AVG. Now, however, the cume and cume rating for the station is on the same line.

Otherwise the methodology is the same as that in the Spring 87 edition of American Radio. For more information see pages B1-B4 in that edition.

1987 PUBLICATIONS FROM JIM DUNCAN

AMERICAN RADIO

Now a quarterly (with one supplement) AMERICAN RADIO remains the radio industry's most complete and timely sourcebook of radio ratings and programming information. There are over 30 tables and rankings for each market plus - in the Spring and Fall editions - over 60 pages of national rankings. AMERICAN RADIO is considered to be the "bible" of the radio industry and is required reading for anyone involved with radio.

DUNCAN'S RADIO MARKET GUIDE

Designed to be a companion volume to AMERICAN RADIO, this book examines the economic conditions of 170 markets. Included are: radio revenue histories and projections on a yearly basis between 1981 and 1991; revenue estimates for over 1,500 important stations; revenue estimates for competitive media (TV, newspaper, outdoor; Duncan's opinions about each market; population and retail sales histories and projections; group revenue estimates; radio's most admired groups and stations; local radio account information; revenue per share point estimates; station sales since 1982; and much, much more (over 30 other tables).

PUBLISHED EVERY DECEMBER Price: $195.00

AMERICAN RADIO - 10 YEAR ANNIVERSARY ISSUE

This very special issue was published in early 1987. Subtitled "A Prose and Statistical History (1976 to 1986)" it provides a history of each rated market covering the last decade. Included are station ratings for each year, station sales since 1970, format and call letter changes covering the last decade and much, much more. The prose portion is a series of articles written by 50 knowledgeable and talented radio people. These articles provide a history of radio covering the decade. This is the finest publication we have ever produced. You will find it helpful, valuable, and interesting.
